Better Water For Your Home & Family

Your Water Quality is a Growing Concern

Aging infrastructure and increasing groundwater contamination is a growing reality and concern. The ingestion and inhalation of water disinfection products, such as chlorine, is also undesirable and unnecessary from both an aesthetic and physical standpoint.

Finding The Right Solution

Improving your water quality is easy and economical. While bottled water remains a popular option for drinking water, it is an expensive, less convenient alternative that creates waste and is hard on the environment.

Aqua Flo™ Water Filtration Products provide you with a wide range of solutions for fresh, clean water. Not only do you get great-tasting water for drinking and cooking, you also get clear, odor free water for washing and utility use. No more carrying or storing heavy bottles either!

Aqua Flo Filter Cartridges are available to solve a wide variety of water problems:

- ◆ Remove dirt, silt, clay and other sediments
- ◆ Remove iron to prevent staining
- ◆ Minimize unpleasant odors, including chlorine

Understanding Your Aqua Flo Filtration System

Aqua Flo Filtration Systems consist of a Filter Housing that connects to your plumbing system and disposable Filter Cartridge that performs the work. Depending on your needs, systems can consist of a single or series of Housings installed either under a specific sink (Point-of-Use) or where the water main enters the home (Point-of-Entry). Filter Cartridges are easily replaced periodically, typically on an annual or semi-annual basis, depending on your incoming water quality.

Water travels through miles of pipes before reaching your home. Chlorine is commonly used to kill bacteria along the way. Once at your tap, it is desirable to reduce chlorine.

Point of Use

Point of Entry

All Aqua Flo Filtration products provide durable, high-quality reliable performance.

The Aqua Flo Platinum line features top-of-the-line performance plus 3rd party certification which is sometimes required by local plumbing codes.

The Aqua Flo Value line also offers great performance and durability at a more economical price point.

Filter Housings

Filter Housings come in different sizes, colors, materials of construction and offer different features.

Here is a quick breakdown:

- ◆ **Size** - Required flow rates and installation space will determine the size of the housing. Housings typically come in four sizes: 2.5"x 10", 2.5"x 20", 4.5"x 10", 4.5"x 20"
- ◆ **Color** - Transparent or Opaque (Blue). Transparent housings allow for visual inspection of the cartridges but are less durable and not suitable for outdoor applications.
- ◆ **Material of Construction** - Plastic is standard for most applications. Stainless steel is used for higher temperature applications.

Features - Some housings provide additional unique features:

- ◆ **Valve-in-Head** - allows you to bypass or shut off the water during cartridge replacement.
- ◆ **Pressure Relief Button** - relieves pressure from the housing prior to changing cartridge
- ◆ **Stainless Steel Threads** - reduces possibility of cross threading and allows for tighter pipe fit
- ◆ **Double O-Ring** - ensures added seal insurance protecting from leaks

WARNING:

Do not use on drinking water supplies, which are microbiologically unsafe or of unknown quality without first adequately disinfecting the water. Protect against freezing to prevent cracking of the filter and water leakage.

NOTE:

All dimensions and micron ratings are nominal. The manufacturer reserves the right to make product improvements which may deviate from the specifications and descriptions stated herein, without obligation to change previously manufactured products or to note the change.

We recommended replacing the clear sump every 5 years. Do not subject to freezing temperatures.
